

## All papers by S. Nakanishi

Shizu Nakanishi

(2006/11/13)

- (1) On Differentiation of Set-Functions with some of its Applications, Osaka Mathematical Journal, 3 (1951), No. 1, 1-9. (with Syunzi Kametani).
- (2) On the Notion of Measurability, Proc. Japan Acad., 27 (1951), No. 5, 208-213.
- (3) Notes sur l'intégration. I – Quelques Propriétés des Fonctions d'intervalle, Proc. Japan Acad., 30 (1954), No. 3, 137-179.
- (4) Notes sur l'intégration. II – Une Propriété du Recouvrement Fermé d l'Intervalle, Proc. Japan Acad., 30 (1954), No. 4, 289-290.
- (5) Notes sur l'intégration. III – Théorème de Fubini, Proc. Japan Acad., 30 (1954), No. 6, 437-442.
- (6) Sur la Structure des Fonctions d'Ensemble dans les Groupes Topologiques Localement Compacts. I, Proc. Japan Acad., 31 (1955), No. 5, 284-287.
- (7) Sur une Totalisation dans les Espaces de Plusieurs Dimensions, I, Osaka Mathematical Journal, 7 (1955), No. 1, 69-102.
- (8) Sur une Totalisation dans les Espaces de Plusieurs Dimensions, II, Osaka Mathematical Journal, 7 (1955), No. 2, 157-178.
- (9) L'Intégrale de Denjoy et l'Intégration au Moyen des Espaces Rangés, I, Proc. Japan Acad., 32 (1956), No. 9, 678-683.
- (10) L'Intégrale de Denjoy et l'Intégration au Moyen des Espaces Rangés, II, Proc. Japan Acad., 32 (1957), No. 1, 13-18.
- (11) L'Intégrale de Denjoy et l'Intégration au Moyen des Espaces Rangés, III, Proc. Japan Acad., 33 (1957), No. 5, 265-270.
- (12) L'Intégrale de Denjoy et l'Intégration au Moyen des Espaces Rangés, IV, Proc. Japan Acad., 34 (1958), No. 2, 96-101.
- (13) Sur la Dérivation de l'Intégrale (E. R.) Indéfinie, I, Proc. Japan Acad., 34 (1958), No. 4, 199-204.
- (14) Sur la Dérivation de l'Intégrale (E. R.) Indéfinie, II, Proc. Japan Acad., 34 (1958), No. 5, 257-262.
- (15) Sur le Théorème de Fubini et les Suites Fondamentales, Proc. Japan Acad., 35 (1959), No. 4, 161-166.
- (16) Sur la Dérivation d'une Intégrale E. R Indéfinie, Proc. Japan Acad., 37 (1961), No. 6, 316-318.

- (17) Sur la Dérivation d'une Intégrale E. R Indéfinie II, Proc. Japan Acad., 37 (1961), No. 7, 363-365.
- (18) Sur une fonction continue qui est partout non dérivable, Proc. Japan Acad., 40 (1964), No. 1, 14-18.
- (19) Sur une représentation des distributions, Proc. Japan Acad., 42 (1966), 457-462.
- (20) E. R. 積分について, 数学, 日本数学会編集, 19 (1967), No. 2, 34-38.
- (21) On Generalized Integrals, I, Proc. Japan Acad., 44 (1968), No. 3, 133-138.
- (22) On Generalized Integrals, II, Proc. Japan Acad., 44 (1968), No. 4, 225-230.
- (23) On Generalized Integrals, III, Proc. Japan Acad., 44 (1968), No. 9, 904-909.
- (24) On Generalized Integrals, IV, Proc. Japan Acad., 45 (1969), No. 2, 86-91.
- (25) On Generalized Integrals, V, Proc. Japan Acad., 45 (1969), No. 5, 374-379.
- (26) On Generalized Integrals, VI—Restrictions of (E.R.) Integrals, I, Proc. Japan Acad., 46 (1970), No. 1, 41-46.
- (27) On the strict union of ranked metric spaces, Proc. Japan Acad., 50 (1974), No. 8, 603-607.
- (28) On the existence proof of Haar measure, Proc. Japan Acad., 50 (1974), No. 10, 789-792.
- (29) The Baire category theorem in ranked spaces, Proc. Japan Acad., 51 (1975), No. 6, 411-414.
- (30) Integration of functions with values in a convex ranked space, Math. Japonica 23 (1978), No. 1, 85-103.
- (31) The method of ranked spaces proposed by Professor Kinjiro Kunugi, Math. Japonica, 23 (1978), No. 3, 291-323.
- (32) On ranked union spaces, Math. Japonica, 23 (1978), No. 2, 249-257.
- (33) The space of distributions treated as a ranked space, Math. Japonica, 25 (1980), No. 1, 87-100.
- (34) Main spaces in distribution theory treated as ranked spaces and Borel sets, Math. Japonica, 26 (1981), No. 2, 178-201.
- (35) Sieves on ranked spaces and Borel-graph theorem, Math. Japonica, 27 (1982), No. 3, 357-380.
- (36) On ranked union spaces and dual spaces, Math. Japonica, 28 (1983), No. 3, 353-370..
- (37) On measures in ranked spaces, linear functionals and compact sets, Math. Japonica, 28 (1983), No. 5, 601-615.
- (38) The Bochner integral for functions with values in certain ranked vector spaces and the Radon-Nikodym theorem, Math. Japonica, 29 (1984), No. 5, 797-814.

- (39) On the topological structure of the space  $S'$ , published in the 20<sup>th</sup> symposium of topological spaces in Jōsei University (Japanese), In 1984.
- (40) Riesz type representation of measures on the union of metric spaces, *Math. Japonica*, 30 (1985), No. 2, 289-299.
- (41) On topological structures of spaces  $C([0, 1], X)$  and  $([0, \infty], X)$ , I, *Math. Japonica*, 30 (1985), No.3, 485-493.
- (42) On topological structures of spaces  $C([0, 1], X)$  and  $([0, \infty], X)$ , II, *Math. Japonica*, 31 (1986), No. 1, 75-84.
- (43) Weak convergence of measures on the union of metric spaces, I, *Math. Japonica*, 31 (1986), No. 3, 429-447.
- (44) On topological structures of spaces  $C([0, 1], X)$  and  $([0, \infty], X)$ , III, *Math. Japonica*, 32 (1987), No. 6, 957-970.
- (45) Integration of ranked vector space valued functions, *Math. Japonica*, 33 (1988), 105-128.
- (46) Ranked-vector-space valued measures and the Radon-Nikodym theorem, *Math. Japonica*, 34 (1989), No. 2, 253-274.
- (47) Some ranked vector spaces, *Math. Japonica*, 34 (1989), No. 5, 789-813.
- (48) Methods of ranked spaces and the Kunugi Integral, *SEA Bull.* 14 (1990), No. 1, 1-15.
- (49) On controlled convergence theorem for Henstock-Kurzweil integrals, *SEA Bull.* 14 (1990), No. 2, 135-141.
- (50) A Banach-Steinhaus theorem on the space of Denjoy integrable functions, *Math. Japonica*, 36 (1991), No. 1, 185-200.
- (51) A closed graph theorem in the space of Denjoy integrable functions I, *Math. Japonica*, 36 (1991), No. 3, 623-529.
- (52) The Denjoy integrals defined as the completion of simple functions, *Math. Japonica*, 37 (1992), No. 1, 89-101.
- (53) An extension theorem for  $r$ -continuous linear operators on Denjoy integrable functions, *Math. Japonica*, 37 (1992), No. 2, 283-290.
- (54) A remark for convergences of Denjoy integrals, *Math. Japonica*, 37 (1992), No. 3, 473-478.
- (55) Differential calculus in (CUN) spaces, I, *Math. Japonica*, 37 (1992), No. 6, 1169-1157.
- (56) Completions of ranked spaces and their applications to the study of nonabsolute integrals, *Topology and its applications*, 54 (1993), 84-95.
- (57) Completions of ranked spaces and their applications to non-absolute integrals, I,

- Math. Japonica, 38 (1993), No. 4, 605-626.
- (58) The Henstock integral for functions with values in nuclear spaces and the Henstock Lemma, *Journal of Mathematical Study*, 27 (1994), No. 1, 133-141.
- (589) The Henstock integral for functions with values in Nuclear spaces, *Math. Japonica*, 39 (1994), No. 4, 309-335
- (60) A new definition on the Denjoy's special integral by the method of successive approximation, *Math. Japonica*, 41 (1995), No. 4, 2173-230.
- (61) Completions of ranked spaces and their applications to non-absolute integrals, II, *Math. Japonica*, 41 (1995), No. 3, 513-530.
- (62) Multidimensional non-absolutely convergent integrals by the method of successive approximation, I. *Math. Japonica*, 42 (1995), No. 3, 403-428
- (63) Mutidimensional non-absolutely convergent integrals by the method of successive approximation, II, in connection with Riemann type integrals, *Math. Japonica*, 45 (1997), No. 1, 133-158
- (64) Equivalence of the McShane and Bochner integrals for functions with values in Riemannian (UCs-N) spaces endowed with nuclearity, *Math. Japonica*, 47 (1998), No. 2, 261-272 (with K. Sakurada).
- (65) Riemann type integrals for functions with values in Nuclear spaces and their properties, *Math. Japonica*, 47 (1998), No.3, 367-396.
- (66) Integrals for nuclear countably Hilbert space valued functions and ordinary differential equations, I, *Math. Japonica*, 49 (1999), No.1, 73-79.
- (67) Integration by the method of successive approximation: Multidimensional generalizations of Denjoy's special integral, *MATIMYAS MATEMATIKA*, 22 (1999), No. 2, 104-111.
- (68) Integrals for nuclear countably Hilbert space valued functions and ordinary differential equations, II, *Math. Japonica*, 50 (1999), No. 1, 67-77.
- (69) Approximation theory by Lebesgue integrals for multidimensional non absolutely convergent integrals, *Math. Japonica*, 51 (2000), No. 3, 479-486.
- (70) Approach to non-absolute integration by successive approximations, *Scientiae Mathematicae Japonicae*, 54 (2001), No. 2, 391-426.
- (71) A structure of an increasing sequence of closed sets whose union is a multidimensional interval, *Scientiae Mathematicae Japonicae*, 55 (2002), No. 1, 1-15, e5, 303-317.
- (72) Non-absolute multiple integral defined constructively on the Euclidean space and iterated integral, *Scientiae Mathematicae Japonicae*, 58 (2003), No. 3, 495-520, e8, 249-282.

(73) A multidimensional integration, *Scientiae Mathematicae Japonicae*, 60 (2004), No. 1, 61-94, e10, 259-292.
